

Dear Sir or Madam,

I would like to comment in regard to the proposal to expand Low Power FM over FM translators. I am personally opposed to this, because my community of Hampton Roads, Virginia is served by the national and regional broadcaster K-LOVE radio, which comes to me via an FM translator on 90.7 FM. K-LOVE makes a huge difference in my community. It serves me by bringing a positive message of hope into my house or car. When so many radio stations are full of profanity, sex, drugs, and violence, K-LOVE has none of these things that are so objectionable to me and many other people. K-LOVE is an irreplaceable asset to my community. I personally know dozens of families in my church that listen to K-LOVE and would be as distressed as I am if it were to be knocked off the radio. I also know that KLOVE is very popular with people not just in my church, but in many other churches throughout the community. It offers a positive alternative that is definitely in the public interest. Since it is a listener-supported radio station, it is truly responding to what its listeners want and need in a radio station. My family contributes \$40 a month to help support our local KLOVE station. The pre-emption of FM translators in our area would be devastating and I would no longer have a radio station to listen to that I love. K-LOVE is definitely serving the public interest- its message of hope and peace in God always brightens my day and that of so many other people no matter how our days are going. If any radio station deserves not to be taken away in our area, it is positive, encouraging K-LOVE! Thank you for reading my comment and please don't take my KLOVE!
